

September 18, 2024

The Radalink AirCat is a blind continuous radon monitor that is analyzed by Radalink, Inc.

As such Radalink is the analytical service provider and conducts performance demonstrations multiple times per year with the chamber at Bowser Morner.

Radalink only leases the monitors to testers and is responsible for all calibrations and repairs. A new monitor is supplied before calibration is expired. Radalink tests are guaranteed to be performed with calibrated monitors.

New customers to Radalink seeking initial licensing or certification who test in a regulated state will not receive their AirCat monitor until the license or certification is supplied. As such they will not have a calibration certificate until they receive their first monitor after providing the license or certification.

Should this document not suffice, please contact Radalink at 800.295.4655 should you need a performance demonstration or calibration certificate for licensing, certification, or any renewals.

The Radalink AirCat is an NRPP and NRSB approved device:

NRPP Device Number	BC-477
NRSB Device Number	31825

Radalink as an analytical laboratory holds the following certifications:

LABORATORY CERTIFICATIONS/LICENSES		
STATE	CERT#	TYPE
Florida	RB1585	Radon Measurement Services
